

PM *Life.*

LIFELONG LEARNING IN POWDER METALLURGY

PM Life is a training programme to help develop the future of Powder Metallurgy and help provide a comprehensive training course to those looking for a related career.

The course will offer students chance to either attend the full five-week programme to learn about the whole industry or pick specific modules to further their knowledge in certain areas. PM Life also offers an optional internship either in a factory or in a university, to practice what has been discussed during the course in a working environment.

PM Life will help provide the knowledge and experience needed to help you take the next step in your career.
